DETAILED ACTION

This communication is responsive to Response After Final Rejection filed on April 13, 2005.

Response to Arguments

1. Applicant's arguments, see pages 2-6, filed April 13, 2005, with respect to claims 1-7 have been fully considered and are persuasive. The rejection of claims 1-7 has been withdrawn.

Allowable Subject Matter

2. Claims 1-7 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 1-7 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches a method for transmission of a packet of facsimile data between a first facsimile machine and a second facsimile machine via a network comprising the steps of determining an interval of time between the moment of reception and the expiry of the period (T) according to the moment of transmission; comparing the interval of time to a retransmission threshold (P) ; if the interval is greater than the threshold (P), retransmitting the response of the second facsimile machine to the first facsimile machine, and if the interval is not greater than the threshold (P) , blocking the response. Gabrielsen et al fails to teach the step of comparing the interval of time to a retransmission threshold (P) as set forth in independent claim 1.
